Expand your h

Expand your horizons, open a satellite door.

Studform has been building quality commercial doors for over 15 years – our team is experienced in providing custom built doors to your project specifications.

The Satellite range encompasses a wide selection of designs and finishes to suit many applications including:

- Office fitout
- Medical and hospital
- Schools
- Public buildings

Satellite metal clad and security doors

Satellite metal clad and security doors offer clients peace of mind when selecting doors for commercial and industrial applications.

Studform consistently provides clients with door packages for Prisons, institutes and government departments, which offer a high level of security and meet all aesthetic requirements.

- Correctional facilities
- Shopping centres
- Airports
- Industrial premises

Satellite fire doors

Fire safety standards are satisfied simply when using Satellite Fire rated doors – various designs available to meet all relevant regulations while meeting your project design requirements.

Satellite Fire rated doors are another example of the ability to blend aesthetics with performance.

orizons

**A great door starts
with the core.**

Satellite commercial doors – constructed with care.

At Studform we have been hand crafting doors for almost 20 years – long enough to know how to build a door that is strong, stunning, and performs to all your expectations.

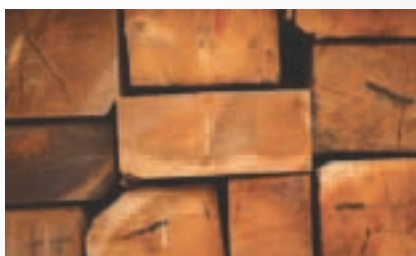

Careful attention is given to every detail during the manufacturing process to ensure the end product is worthy of the Satellite stamp of quality.

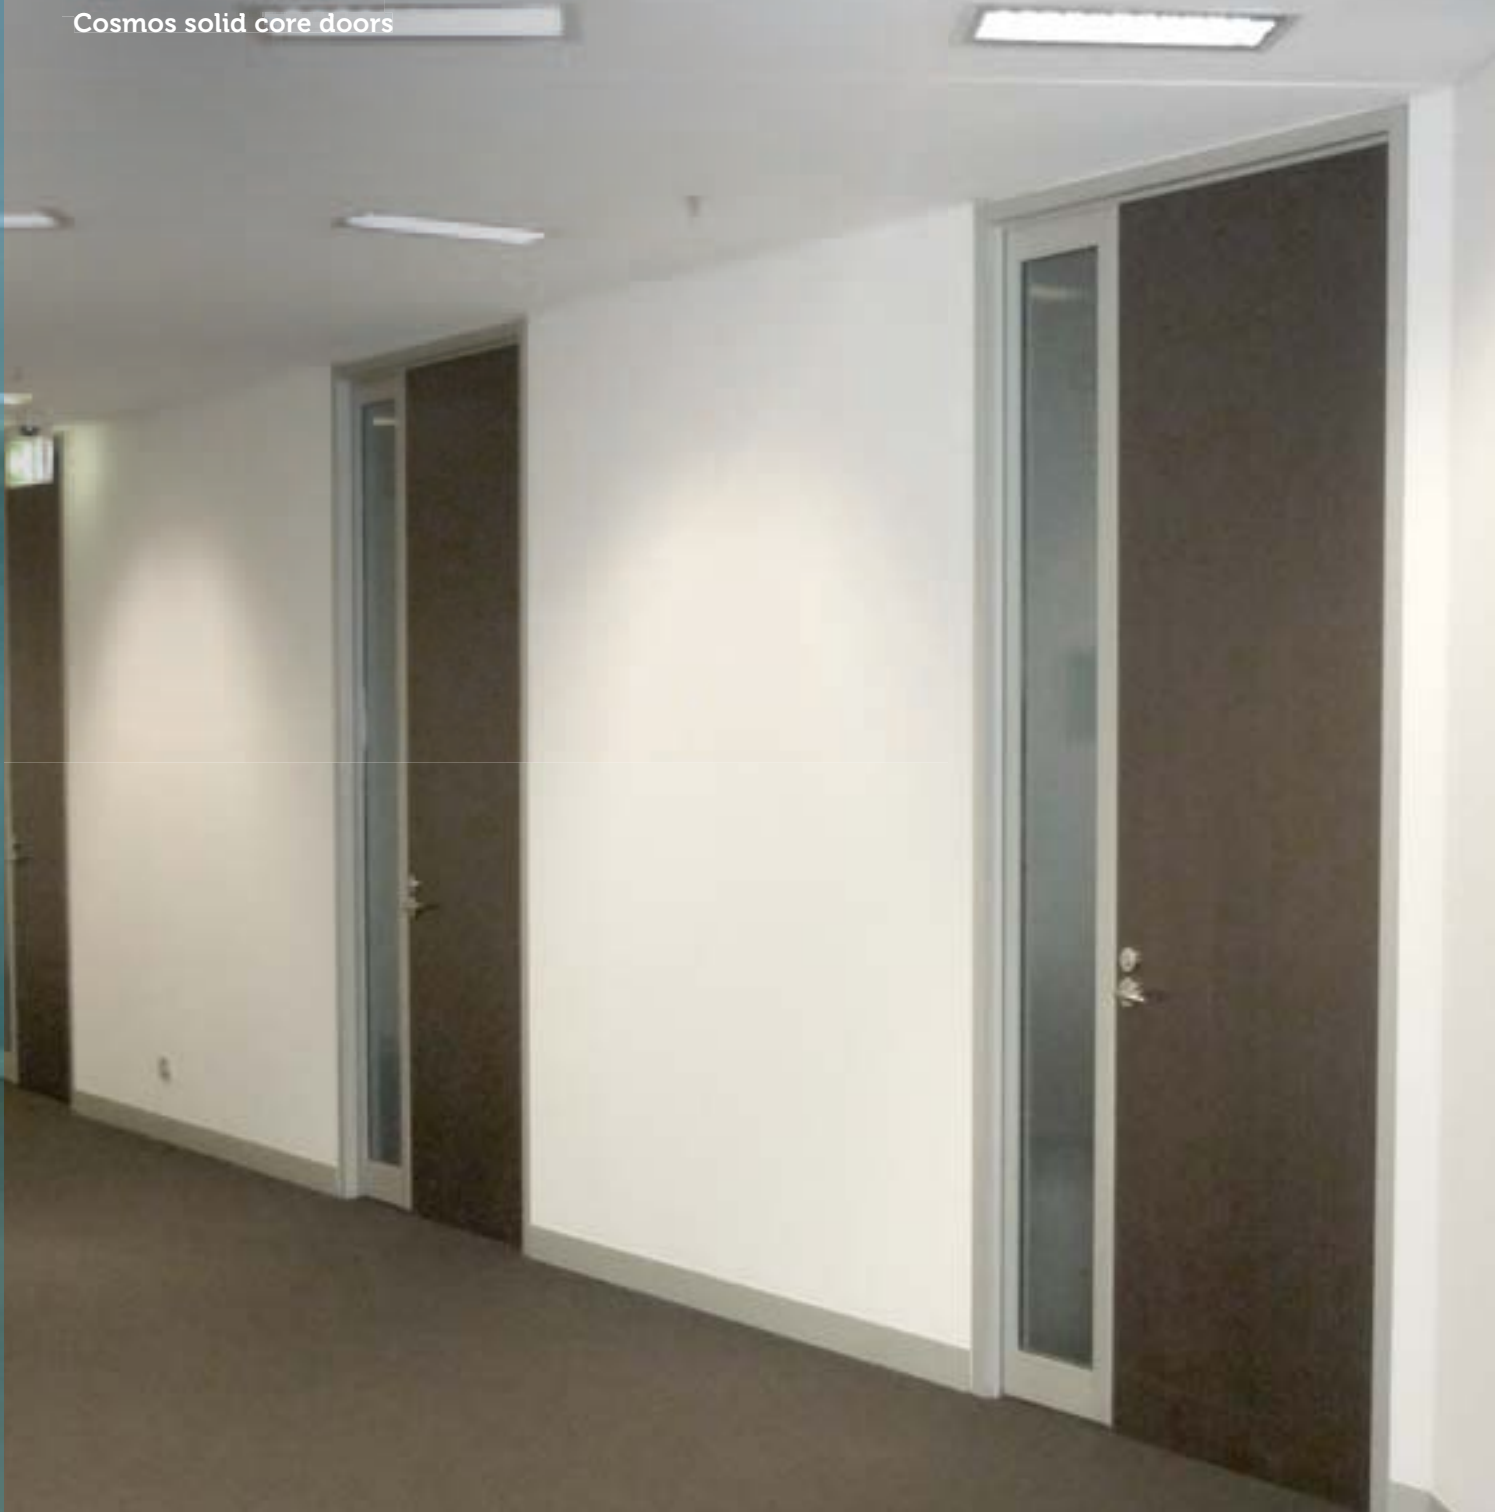

Satellite doors are mostly a composite product ie they are laminated from various materials to achieve a door which is strong, light, and looks great.

So it's a little like your building project – one weak link can let the whole team down.

For this reason, only the best quality native and exotic timbers are selected, along with core materials which are guaranteed to compliment the finished product

Components such as edge strips, glues, veneers are selected and applied with the utmost care to ensure the end result is everything you expect.

Corporate looks, **old fashioned quality.**

Cosmos solid core doors

Cosmos doors boast a solid core, flush panel construction, with a 12mm hardwood trim to 4 sides and choice of veneers on each face.

The cosmos construction offers the highest achievable quality apart from solid single timber doors. This door consistently rates as our most popular door due to the winning blend of strength, resistance to movement, and attractive finishes.

Available in a huge range of sizes, with your choice of custom features including:

- Glazing cutouts
- Hardware cutouts
- Extra trim timber
- Stainless or Aluminium kickboards

Cosmos typical construction

Eclipse foam core doors

Eclipse doors feature a composite construction with a foam core. Each door is built with a radiata pine outer rail, 98mm chipboard secondary rail, and a 12mm hardwood trim to all 4 sides.

The Eclipse construction offers a lightweight and cost effective door whilst maintaining good levels of acoustic performance.

This door is a favourite with contractors and clients alike for ease of installation and great aesthetics - consistently used on fitout projects with selected veneers which meet specific project requirements

Available in a huge range of sizes, with your choice of custom features including:

- Glazing cutouts
- Hardware cutouts
- Extra trim timber
- Stainless or Aluminium kickboards

Eclipse typical construction

Costs less than a solid core door, weighs next to nothing,
and looks a million dollars.

Nimbus hollow core doors

An ordinary hollow core door built with extraordinary care. Each door is constructed with a radiata pine outer rail, 98mm chipboard secondary rail, and a 12mm hardwood trim to all 4 sides.

The Nimbus construction offers a lightweight and cost effective door without cutting corners on quality of construction or overall finish.

This door is available with a wide selection of veneers to meet specific project requirements, or in standard ply for painted applications

Available in a huge range of sizes, with your choice of custom features including:

- Glazing cutouts
- Hardware cutouts
- Extra trim timber
- Stainless or Aluminium kickboards

Nimbus typical construction

Economy and **quality** combine.

For the ultimate commercial door –
ask for Galaxy construction by Satellite doors.

Classic construction

Premium construction

Ultimate construction

Galaxy metal wrapped doors

For the ultimate commercial door – ask for Galaxy construction by Satellite doors. Durability and reliability in the toughest applications are the criteria for which this range was designed

Galaxy doors are available in 3 standard door constructions: classic, premium and ultimate. Each Galaxy door is finished with a metal skin fully glued to both faces with a choice of edge wrap detail to all sides.

This construction is ideal for the following applications: supermarkets, police stations, mental health, court facilities, detention centres, public transport areas etc.

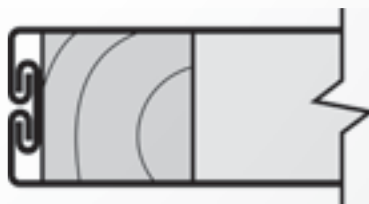

This door is available with a wide selection of metal finishes such as colorbond, Galv steel or metal in custom thicknesses for high security applications. Speak to the Studform team about your specific project requirements.

Available in a wide range of sizes, with your choice of custom features including:
